

# HNRS 404: Science and Belief

A study of the philosophies and methodologies of science. The course includes a review of the history of scientific and religious thought, with particular attention given to the role each has played in the development of modern theories of origin. This class satisfies the general education requirement for an upper-division religion class (Also taught as BIOL, GEOL or RELT 419). This course partially satisfies the general education requirement for religion for non-biology majors. Biology majors may take this course to satisfy their major requirements as well as their Honors requirements.
