

BIOL 330: Bacteriology and Virology

Biology of bacteria, viruses, fungi, and other microorganisms, and their interactions with their environment. Includes surveys of microbial diversity and taxonomy, human-microbe relationships, environmental and industrial microbiology. Bacteria and viruses will be used in the laboratory to provide training and experimental methodology. 3 Theory 1 Lab. Lab fee.

Credits: 4

Lab Hours: 3

Lecture Hours: 3

Prerequisites:

BIOL 111

BIOL 112

BIOL 320

Program: **Biological Sciences**

Semester Offered: Periodically
