

BUAD 420: Project Management

Covers the essential tools, concepts and best practices of project management being used in today's real world. The course uses a managerial process approach that includes initiation, planning, executing, controlling and closing phases of a project. Some course topics include strategy and project selection, project definition, project times and costs, scheduling resources and costs, risk, and progress/performance measurement and evaluation. The course also utilizes information from the Project Management Institute (PMI) and the Project Management Body of Knowledge (PMBOK®) and will contribute to the preparation needed to pass the CAPM (Certified Associate in Project Management) certification exam.

Credits: 3

Program: Business Administration

Semester Offered: Spring
