The mission of Southwestern Adventist University's Department of Kinesiology is to promote lifetime physical activity and a healthy lifestyle for all students at the university. It further seeks to prepare kinesiology majors for a variety of careers by fostering the knowledge and skills needed to be successful in the field. All this is done in a Christ-centered environment shaped by Seventh-day Adventist and Christian values. In addition, the Kinesiology department focuses on the development of the whole student. The integration of the physical, mental, and spiritual powers within the curriculum, instruction, and activity is paramount to the program. We seek to prepare students for success in their chosen professional careers by developing critical thinking, communication, and analytical skills. Of special concern is the development of an understanding and respect for God's amazing creation, the human body.

Job Market

Exercise Science is an excellent pre-professional course of study for exercise physiology, cardiac rehabilitation, physical therapy or other areas of sports medicine.

Job Outlook

According to the bureau of Labor Statistics, employment of physical therapists projects 16.9% employment growth for physical therapists between 2021 and 2031. In that period, an estimated 40,300 jobs should open, which is much faster than the average for all occupations. Demand for physical therapy services will come, in large part, from the aging baby boomers who are staying active later in life than previous generations did.

Earnings

The median annual wage of physical therapists was \$87,930 in 2018. The median annual wage of exercise physiologists was \$49,270 in 2018. The median annual wage for occupational therapists was \$84,270 in 2018.

Educational Qualifications:

Physical therapists are required to have a postgraduate professional degree. Physical therapy programs usually award a Doctor of Physical Therapy (DPT) degree, although a small number award a Master of Physical Therapy (MPT) degree. Doctoral programs typically last 3 years; MPT programs require 2 to 3 years of study. Most programs, either DPT or MPT, require a bachelor's degree for admission, and many require specific prerequisites, such as anatomy, physiology, biology, and chemistry. Physical therapy programs often include courses in biomechanics, anatomy, physiology, neuroscience, and pharmacology. Physical therapy students also complete clinical rotations, enabling them to gain supervised work

experience in such areas as acute care and orthopedic care. Physical therapists may apply to and complete residency programs after graduation. Residencies last 9 months to 3 years and provide additional training and experience in advanced or specialty areas of care. All states require physical therapists to be licensed.

Exercise physiologists typically need at least a bachelor's degree. Degree programs include science and health-related courses, such as biology, anatomy, kinesiology, and nutrition, as well as clinical work.

Occupational therapists typically have a master's degree in occupational therapy. All states require occupational therapists to be licensed.
