The mission of Southwestern Adventist University's Department of Kinesiology is to promote lifetime physical activity and a healthy lifestyle for all students at the university; it further seeks to prepare kinesiology majors for a variety of careers by fostering the knowledge and skills needed to be successful in the field. All this is done in a Christ-centered environment shaped by Seventh-day Adventist and Christian values. In addition, the Kinesiology department focuses on the development of the whole student. The integration of the physical, mental, and spiritual powers within the curriculum, instruction, and activity is paramount to the program. We seek to prepare students for success in their chosen professional careers by developing critical thinking, communication, and analytical skills. Of special concern is the development of an understanding and respect for God's amazing creation, the human body.

Job Market

A major in Health and Fitness prepares the student to become a certified personal trainer or a strength and conditioning specialist and find a career in the hospital, corporate, or private fitness industry. Dietitians and nutritionists are experts in the use of food and nutrition to promote health and manage disease. They advise people on what to eat in order to lead a healthy lifestyle or achieve a specific health-related goal.

Job Outlook

Employment of fitness trainers and instructors is expected to grow by 10 percent from 2016- 2026, faster than the average for all occupations. As businesses and insurance organizations continue to recognize the benefits of health and fitness programs for their employees, incentives to join gyms or other fitness facilities will increase the need for workers in these areas. Employment of dietitians and nutritionists is projected to grow 15 percent from 2016 to 2026, much faster than the average for all occupations.

Earnings

The median annual wage of fitness trainers and instructors was \$39,820 in 2018. The median annual wage for dietitians and nutritionists was \$60,370 in 2018.

Wellness and fitness programs include a combination of theory-based courses, laboratory experiences, and internships in the fitness industry intended to provide students with practical, career-focused skills. Common courses include personal training, nutrition, and fitness promotion among special populations. Certification is highly recommended. Certification requirements in the fitness industry vary widely, with many certifying organizations offering a variety of credentials. For those interested in further education, master's degree programs are common in wellness and fitness, exercise science, and kinesiology. Dietitians and nutritionists typically need a bachelor's degree, along with supervised training through an internship. Many states require dietitians and nutritionists to be licensed.
